Candid.

Now hiring
Software Engineer

Candid is looking for a full time Software Engineer who is eager to help design, develop, and maintain software and database applications including server-side and client-side web components.

See the world. Make it better.

On February 1, 2019 Foundation Center and GuideStar joined forces to become Candid, a 501c3 nonprofit organization. Candid connects people who want to change the world to the resources they need to do it.

Every year, millions of nonprofits spend trillions of dollars around the world. Candid finds out where that money comes from, where it goes, and why it matters. Through research, collaboration, and training, Candid connects people who want to change the world to the resources they need to do it. Candid’s data tools on nonprofits, foundations, and grants are the most comprehensive in the world.

Candid’s vision is an ambitious one. But we know that when we make investments in our talent, it translates to more access and better knowledge for those working for social good around the world.

Position: Software Engineer
Reporting to: Senior Director, Technology, Application Development
Supervises: N/A
Location: Williamsburg, VA or New York City, NY
